

How to set up Kaleidoscope

Version 7

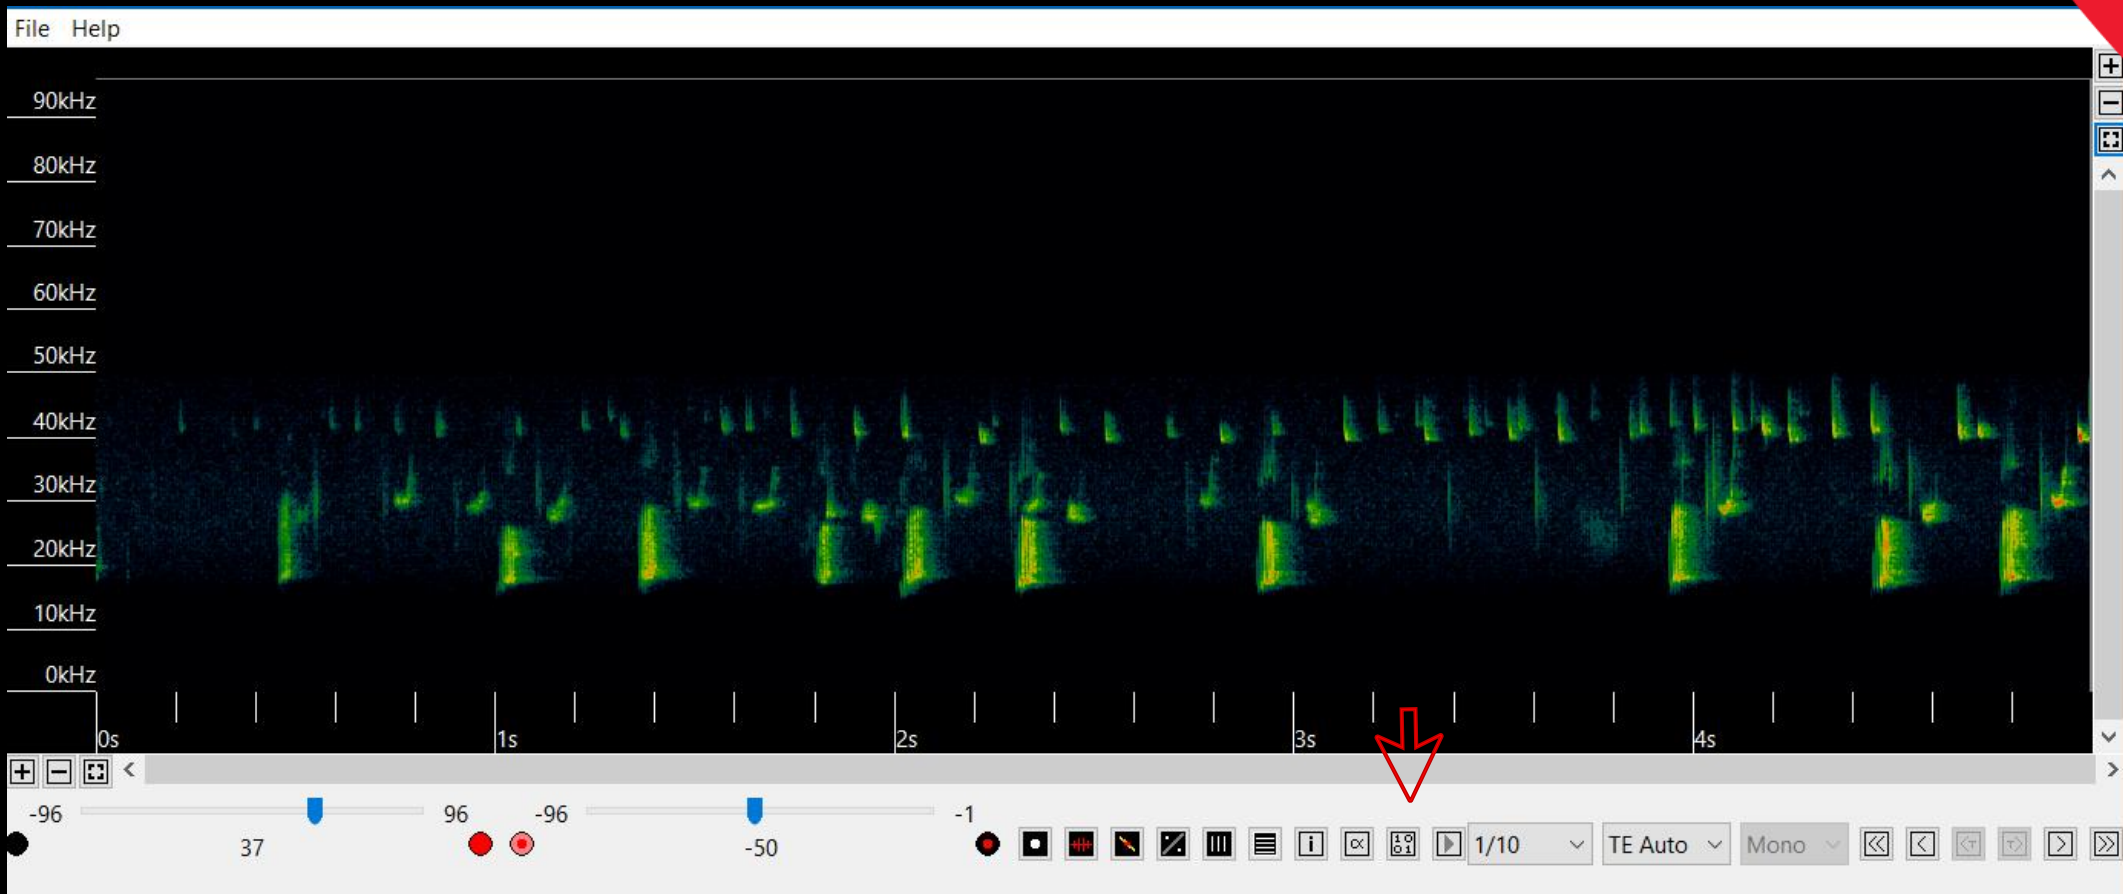

1. Once Kaleidoscope is installed, you need to upload the labels for all the species and phonic groups.
2. Download the “Kaleidoscope.ini” file which is available on [this link](#).
**It is possible that the Kaleidoscope.ini file does not have the .ini extension.*
3. Open the Kaleidoscope software. Click on “File” and select “Load settings”.
4. Select the “.ini” file that you have just downloaded.

How to set up Kaleidoscope

Version 7

4. In order to confirm that the labels have been correctly added, click on the labelling button

How to set up Kaleidoscope

Version 7

5. If the labels have been correctly added, the following species and phonic groups labels should appear.

- Barbar: *Barbastella barbastellus*
- BarSp: *Barbastella barbastellus* / *B. caspica*
- EptNycVes: *Eptesicus serotinus* / *E. isabelinus* / *E. nilssonii* / *E. anatolicus* / *E. ognevi* / *Nyctalus leisleri* / *N. noctula* / *Vespertilio murinus*
- Hyspav: *Hypsugo savii*
- Minsch: *Miniopterus schreibersii*
- MinSp: *Miniopterus schreibersii* / *M. pallidus*
- Mnat: *Myotis nattereri* / *M. escalerae* / *M. crypticus*
- Myo30: *Myotis myotis* / *M. blythii* / *M. punicus*
- Myo50: *Myotis daubentonii* / *M. schaubi* / *M. capaccinii* / *M. emarginatus* / *M. alcathoe* / *M. mystacinus* / *M. brandtii* / *M. crypticus* / *M. escalerae* / *M. bechsteinii* / *M. brandtii* / *M. davidii* / *M. dasycneme*
- NycSp: *Nyctalus leisleri* / *N. noctula*
- Nycazo: *Nyctalus azoreum*
- Pleten: *Plecotus teneriffae*
- Pipmad: *Pipistrellus maderensis*
- Pkuhnat: *Pipistrellus kuhlii/nathusii*
- PpygMin: *Pipistrellus pygmaeus* / *Miniopterus sp.*
- Pippip: *Pipistrellus pipistrellus*
- Pipnat: *Pipistrellus nathusii*
- Pipkuh: *Pipistrellus kuhlii*
- Rhieur: *Rhinolophus euryale*
- Rhihip: *Rhinolophus hipposideros*
- Rhifer: *Rhinolophus ferrumequinum*
- Rhipmeh: *Rhinolophus hipposideros* / *R. mehelyi*
- Reurmeh: *Rhinolophus euryale* / *R. mehelyi*
- Rhibla: *Rhinolophus blasii*
- TadNyc: *Tadarida teniotis* / *Nyctalus lasiopterus*
- Tapnud: *Taphozous nudiventris*
- NoID: non identified bat
- Noise: other non bats

If there are more than one bat species, click on “Ctrl” + all necessary labels
